The huge galley is designed for cooking at sea and managing major entertaining in port. Have you ever viewed more sea-going counter space?

Here's how the aft area works - galley to starboard, nav station to port, and owner's stateroom (with opening porthole to the cockpit) near the center of action.

The head area is set in an easy to maintain space with just enough teak to keep it from being stark.

Ah the comfort bespoken by the leaded glass liquor locker - rewarding after a long satisfying beat to weather.
